Internship Task Instructions – Group A-

Overview

This task is designed for beginners who are currently in the Flutter setup phase or are familiar with only basic widgets. The goal is to build foundational skills by developing simple authentication UIs.

Provided UI Screens

You will be provided with a template containing 5 screens:

1. Login Screen (Type A)
2. Signup Screen (Type A)

3. Login Screen (Type B)
4. Signup Screen (Type B)

5. Dasboard Page

Your Task

Build the following screens using the provided UI template:

- Login
- Signup
- Forgot Password
- Home Page (Basic Layout)

Implement simple navigations between these screens using Flutter's Navigator.push and Navigator.pop.

Widgets to Use

You must use the following basic widgets:

- Scaffold

- Column / Row
- TextField
- ElevatedButton/Outline Button
- Text
- Icon
- Container / SizedBox
- Image.asset (for logo or UI assets)
- Navigator for screen transitions
- SingleChildScrollView (to prevent overflow) and scrolling screen, also check its property scroll direction to scroll list vertical and horizontal
- you can also use listview widget

Extra Tips

Keep your UI structure clean. Use padding and margin for spacing.

Use consistent text styles.

Separate widgets using Divider where necessary.

Level Up (Optional)

Once you're done with the basic version, try replacing Containers with Card widgets to improve the UI look.

Example: Instead of a simple Container for form fields, wrap them inside a Card with elevation and rounded corners.

Explore ListTile or other Material widgets if you're curious.

Templates are attached:
